

## Matthew M. Antonucci, DC, DACNB, FACFN, FABCDD, FABVR, FABNN

---

While studying for his Doctorate in Chiropractic at Life University, Dr. Antonucci became fascinated with the nervous system, particularly the brain, of humankind. He began taking extra-curricular neurology classes to understand the brain and nervous system better, and became enthralled with the study of neurology. He has a professional Master's degree in neuroscience; has been awarded a diplomate in the sub-specialty of chiropractic neurology; is a certified fellow in multiple specialties: vestibular disorders, brain injury rehabilitation, nutrition and neurochemistry, childhood developmental disorders, and functional neurology. He has been inducted as a fellow into the exclusive and honorable International

College of Chiropractic. Over the years, Dr. Antonucci had the great fortune of having spent thousands of hours as a first-assist in clinical rounds with Professor Frederick R. Carrick, a pioneer in the field of clinical neuroscience and rehabilitation. Throughout that time, he was constantly being guided and empowered to pursue clinical excellence.

Dr. Antonucci finds particular interest in treating traumatic brain injuries (TBIs), childhood developmental disorders, vestibular rehabilitation, movement disorders, sports and neurological performance enhancement, degenerative conditions, and conducting clinical research.
